

## Immrama - iOS Performers

### Preparing your iPhone or iPad

Any device with a web browser can be used to view the score. Users are advised to take a few steps before performances or rehearsals.

- Set the device to silent
- Disable receiving SMS and phone calls
- Ensure that WiFi is turned on
- Set a long delay before the screen turns off
- Consider disabling your device password
- Ensure your device is fully charged

### Joining the network

- Join the Immrama wifi network.
- The wifi password is 12345678
  - If this changes, write it down.
- iPhone and iPad users may see a prompt to log in to the network via a web page.
  1. First, use Safari or another browser to try connecting to one of the following URLs:
    - <http://immrama.local>
    - <http://immrama>
    - <http://immrama.home>
    - <http://immrama.localnet>
    - <http://172.24.1.1>
    - <http://kent.ac.uk>
  2. If your device drops your network connection or fails to load the piece from those URLs, then follow the login prompt to open the login page.

### Opening the Piece

- Once logged in, users should see a button on the top left of their screen.
- Touch screen users should click this button. Others should put their mouse pointer over it.
- A drop down menu should appear.
- Performers should click on the **Performers** link

- Some users will not see a drop down menu. Instead, they will see a button that has some text links by it or below it. Those users should click the **Old Devices** link
- All Performers should then see a screen which says **Ready**
- Performers should try to use their web browser to make a bookmark of this page. Save the link to your desktop and use that link when you next join the piece
- Some performers will see a small button on the top left corner. They may click it to select **Full Screen**
- To keep their screen from turning off, those using touch screen can stroke the bottom of their screen gently throughout the piece.
- Performers *should not* click the **Conductor** link. You are on the honor system.

## Troubleshooting

When the piece is running, not everyone will see updates at the same time. If you do not see updates at all:

1. Make sure you are on the right wifi network. If your device allows you to say which devices you prefer, put this one at the top of the list.
2. If your device keeps switching to another network (such as eduroam) and you can't get it to stop otherwise, tell it to forget the other network. In this case, you will need to forget the network before every performance or rehearsal of the piece. When you rejoin the 'forgotten' network later, you will need to have the password, etc as if you are a new user.
3. Check if you have javascript disabled. If so, enable it and reload the page.
4. If you still do not see updates, go back a page and select **Old Devices**. Be sure to update your bookmark.
5. Some older models of iPhone just stop displaying the piece after some amount of time has passed. Those users may rejoin the piece by rejoining the network or may wish to find an alternative way of viewing the notation.
